Zeckei's Quality Guarantee

Our promise:

- ✓ Exquisite Japanese Matcha qualities from organic farming
- ✓ Permanent laboratory analyzes for absolute food safety
- ✓ Complete traceability, from the tea plant to the consumer
- ✓ Exclusive processing of organic Matcha from Kagoshima, Kyoto and Shizuoka prefecture
- ✓ Long-term contracts with local organic tea farmers to guarantee a consistent quality
- ✓ Two-stage shading of the tea bushes during the last 25 days before harvesting
- ✓ Gentle grinding to fine powder on granite stone mills (Horizon, Tenno, Samurai & Gourmet)
- ✓ Further processing and packaging in certified facilities
- ✓ Innovative and fashionable products in addition to the traditional tea ceremony
- ✓ Best price & quality guarantee based on direct import and inhouse production
- ✓ Made in Japan with best possible freshness

The special feature of Zeeki's Organic Matcha

ZEEKEI GmbH's own brand MatchaMagic® with its sign of energy in the logo, stands for green caffeine.

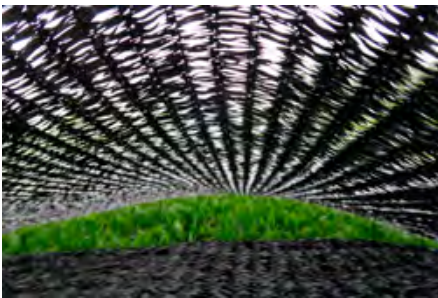

Only Tencha leaves from organic farming in Kagoshima, Uji and Shizuoka prefecture are processed for MatchaMagic® and Magic Caps® products.

Matcha is very nutritious and contains a high amount of chlorophyll and amino acids, caused by covering the tea fields before harvest. Only the baby leaves are harvested, steamed and then dried. With Matcha you consume the entire tea leaf. 100% of the valuable ingredients attain their beneficial effects. While infusing the tea leaves, you get only 30% of the water-soluble substances!

Granite stone mills grind the leaves slowly and gently into finest powder. The processing always takes place fresh to order! Matcha has five times more caffeine than coffee! By coupling caffeine with tannins, the absorption is phased over a longer period. The green caffeine is gentle on the stomach and stimulates without anxiety!

Japan's largest *Tencha cultivation area (*Matcha raw material): Kagoshima-, Shizuoka- and Uji-Prefecture.

Tencha tea fields are covered by the black mesh netting on the top and sides during the harvest season. This is the unique cultivation process which makes Matcha more nutritious than any other teas. One month before harvest Tencha tea leaves are covered by the black mesh netting to gradually block sunlight from the leaves. Shading the tea plants makes the leaves thinner, softer, and a more vivid deep green color as a result, produces more chlorophyll and amino acids. Then only the baby leaves are harvested to produce the highest quality matcha.

25 days before harvest 70% shaded

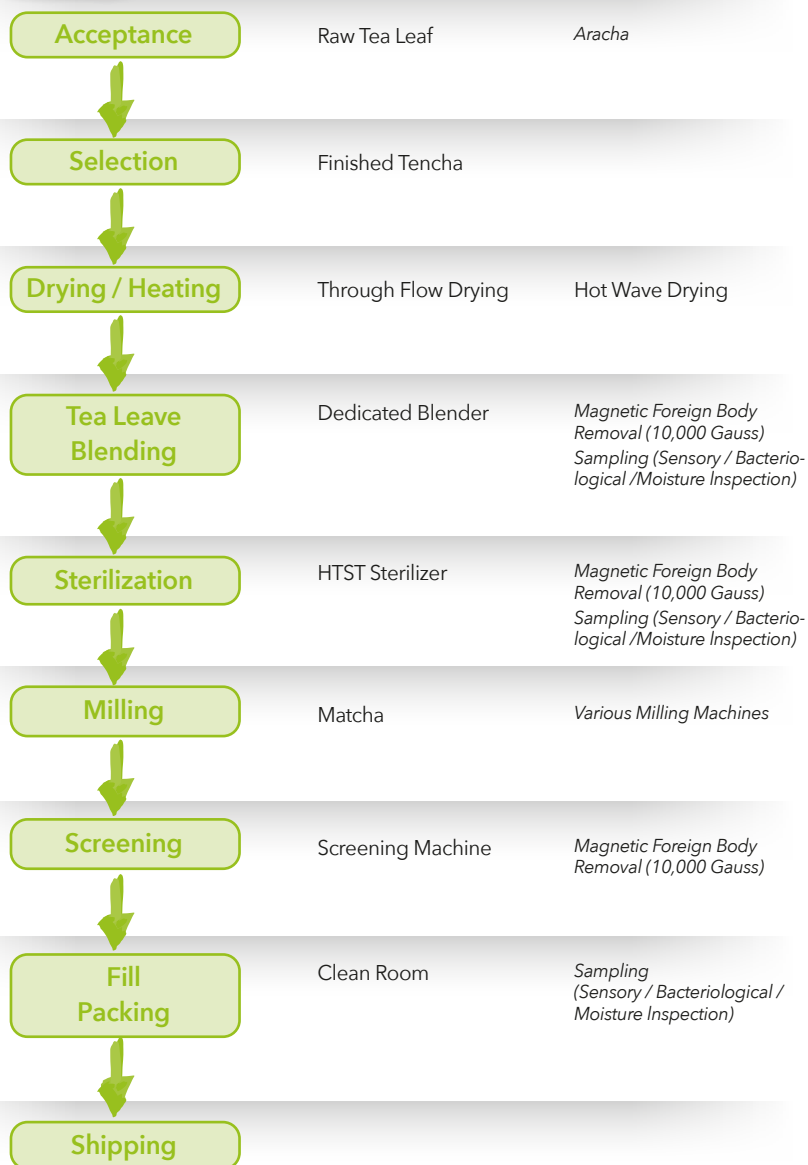

15 days before harvest 95% shaded

By mid-April, the top and the side of the tea fields are entirely covered by black fabric nettings.

The production process

The raw tea leaves picked in the tea fields are processed to Aracha at the Aracha plant and delivered.

Only the Aracha whose history of cultivation and used materials have been confirmed will be accepted.

Aracha is cut, sorted and filtered into tea leaves only.

The sorted tea leaves are dried and heated according to the product quality standards

The dried/heated tea leaves are blended and graded according to the product quality standard.

The sampled tea leaves undergo sensory/ bacteriological/moisture inspection for each blended lot.

The graded tea leaves are sterilized by steam.

The sterilized tea leaves are milled according to the product quality standard .

Depending on the intended use, milling methods are ranging from stone milling to mechanical milling.

The milled tea leaves are screened to remove defective tea leaves and foreign objects (mesh size: 40-100).

The finished Matcha is filled into a package according to the product specification hygienically in the clean room.

Analyses

Physicochemical Analyses

Pesticide Residue Analysis

The raw tea leaves we accept, subject to JAS organic certification, will undergo full lot inspection /analysis to confirm their organic properties.

Component Analysis

A representative lot is taken for the analysis for catechin, amino acid and other general constituents.

Major instruments

Particle Size

Distribution Analyzer

Spectrophotometer

Near-infrared Tea Component Analyzer

Inspections

Bacteriological Inspection

Inspections such as standard plate count, coliform group count and fungi count.

Sensory Inspection

In addition to the quantified evaluation by various analyzers, our professional tasters rigorously test and comprehensively evaluate the quality in terms of color tone & water.

The company ZEEKEI GmbH

Since the beginning in 2012, the management of ZEEKEI GmbH has attached great importance to adhering to Japanese virtues such as respect, courtesy, honesty and transparency.

This business philosophy also includes the products that come exclusively from Japan and are certified according to the EU organic regulation.

In addition to Japanese Green Tea and Matcha, the focus is also on people, regardless of whether they are manufacturers, suppliers, employees, wholesalers or end-consumers.

The company's own brands MatchaMagic®, Magic Caps® and ZEEKEI®-TEAS focus on organic Matcha and organic Green Tea products.

The long-standing partnerships in Japan include renowned and multiple award-winning Matcha and tea producers, with whom intensive personal contact is maintained and who are regularly visited on site by the ZEEKEI company management.

The fully traceable development path of a ZEEKEI product, from the plant to the end consumer, emphasizes the high standards of the company philosophy.

It doesn't matter whether the products are sold under one of the ZEEKEI brands or under one of the numerous private label brands.

For the future we will continue to follow the path of sustainable and green quality products.

Matcha Magic

Brand: MATCHA MAGIC
Product Name: Matcha „X“ for Food & Drinks – Culinary Quality

This Matcha quality has an unbeatable price-performance ratio and gives every preparation the typical Matcha taste and color.

Product Description:

Magic Caps

Brand: MAGIC CAPS®
Product Name: Matcha Capsules, Nespresso®*-compatible

The Nespresso®*-compatible Organic Matcha capsule was our innovation at the ANUGA fair in Cologne 2017. The preparation succeeds in seconds, the result is a velvety Matcha with a deep green color and an emerald-green, solid foam. Ideal for home or office, without bothering with the bamboo whisk. For a delicious Matcha Latte, you can easily add frothy milk.

Product Description:

Product: Organic Matcha Green Tea Powder in green plastic capsule with aluminum lid for Nespresso®*-system
Quality: Superfood Quality – for Daily Use
Purpose: Suitable for Nespresso®*-compatible machines
Sensors: Deep green color, typical green tea taste, emerald-green foam

Packaging Options: Magic Caps®-Label-MOQ:

Magic Caps

Brand: MATCHA MAGIC
Product Name: Roasted Matcha - Hojicha Style

Roasted Matcha is the reinterpretation of Matcha history. There has been a hype for Hojicha Latte in Asia and North America for some time now. Hojicha is roasted green tea that is infused like a regular green tea. But with Roasted Matcha, ground into the finest powder, it is now possible to enjoy Matcha as a roasted variant. The lightly roasted variety has more green tea flavor, while the deep roasted has a nutty note and a deep brown. This is how you make a Hojicha latte very easily, or you whip up the powder in the classic way with hot water and a bamboo whisk.

Product Description:

Product: Organic Roasted Green Tea Powder
Qualities:
- Lightly Roasted Matcha - Hojicha Style
- Deeply Roasted Matcha - Hojicha Style
Purpose: Suitable for cooking and baking,
for refining food and preparing cold & hot drinks.
Sensors Light Roast: Yellowish green, typical green tea taste with a slight roasted note.
Sensors Deep Roast: Brown powder, nutty note with the typical roasted aroma

Packaging Options:

Brand: MATCHA MAGIC
Product Name: Bio Matcha Energy Drink with Mango-Citrus-Flavor

World's first organic Energy Drink with natural caffeine from organic Matcha. Compared to conventional Energy Drinks, MatchaMagic Energy Drink has neither the typical gummy bear smell nor taste, but a pleasant freshness of mango and citrus. The color is yellow-green, the liquid is slightly clouded by the addition of organic Matcha. Natural caffeine in the Matcha Energy Drink increases the ability to concentrate for hours. It provides clarity and alertness while maintaining serenity.

Product Description:

Product: Organic Matcha Energy Drink with high caffeine content (30mg/100ml), with Mango-Citrus-Flavor. Pasteurized.
Quality: Premium Quality Energy Drink
Purpose: Refreshing and energizing beverage with high caffeine content, ideal for mixing with spirits for long drinks
Sensors: Yellowish green, typical green tea taste with mango-citrus-flavor

Packaging Options: MatchaMagic Label-MOQ: Private- & White-Label MOQ:
Art.No.: 0006 - Aluminum Can 250ml 48 Cans 2.880 Cans

Ingredients: Water, sugar*, carbon dioxide, acidifier citric acid, Matcha*, natural caffeine*, caramel sugar syrup*, stabilizer gum arabic, natural citrus-flavour with other natural flavourings (*from organic farming). Without preservatives!

Average nutritional value in 100ml: Energy 175kJ/41kcal, protein 0g, carbohydrates 10g, thereof sugar 9,9g, fat <0,1g, thereof saturated fatty acids <0,1g, salt <0,01g.

Information: Not suitable for children, pregnant women, diabetics and persons hypersensitive to caffeine. Warning of excessive consumption! Shake gently before opening can. Naturally cloudy by the use of bioavailable Matcha.

Shelf Life: 24 Months after Production

Matcha Magic

Brand: MATCHA MAGIC
Product Name: PURE NATURE Matcha Capsules - Dietary Supplement

PURE NATURE capsules are filled with high quality organic Matcha in pure vegetarian capsules. The Matcha capsules are ideal for those who want to quickly, easily and effectively benefit from the advantages of Matcha and its energizing effect. The main argument of the capsule is clearly in the convenient handling. Whether in the office, in the car or on holiday, the simple and clean supply of Matcha is unique.

Shaded and ground organic Matcha green tea powder filled in vegetarian Hypromellose capsules, regularly controlled for pesticide residues and radiation exposure. Shelf life: 24 months after production. Suitable for diabetics, vegetarians and vegans; gluten-free.

No artificial colors, flavors and preservatives added.

60 capsules (24g) packed in PE-tube, 300mg content of pure Matcha per capsule.

Product Description:

Product: Organic Matcha Green Tea Powder - Dietary Supplement Capsules
Quality: Pharmaceutical quality in vegetarian capsules
Directions: Take 2 to 3 capsules daily with plenty of liquid or stir the content of the capsule into a liquid.
Pure Nature Caps are highly energizing by the six times amount of caffeine compared to coffee.

Zeekei Teas

Brand: ZEEKEI TEAS
Product Name: Hojicha Roasted Bio Green Tea

Our organic Hojicha tea leaves are cultivated on nutrient-rich volcanic soil in southern Japan in the Kagoshima Prefecture. The fresh spring water in the high-altitude tea gardens and the gentle roasting process of the green tea leaves produce the typically spicy Hojicha taste with a unique umami. The caramel-colored tea leaf has an amber-colored cup with a nutty scent. This tea is suitable for repeated infusions.

Product Description:

Product: Organic Hojicha Roasted Green Tea Leaves
Quality: Premium Quality - for Daily Use
Directions: 30 seconds with 100°C
Sensors: Golden brown color, aromatic roasted green tea taste

Zeekei Teas

Brand: ZEEKEI TEAS
Product Name: Bancha Premium Bio Green Tea

In Japan, Bancha is especially enjoyed in the afternoons and evenings because of its particular digestibility. The BIO Bancha tea leaves are cultivated on nutrient-rich volcanic soil in southern Japan in the Kagoshima Prefecture. The fresh spring water in the high-altitude tea gardens and the careful cultivation of the tea leaves bring out the slightly bitter Bancha taste with a unique umami. The light green, open tea leaf has a yellow-greenish cup with an aromatic scent.

Product Description:

Product: Organic Bancha Green Tea Leaves
Quality: Premium Quality - for Daily Use
Directions: 60-90 seconds with 90°C

Zeekei Teas

Brand: ZEEKEI TEAS
Product Name: Kukicha Premium Bio Green Tea

In Japan, Kukicha is especially drunk in the afternoons and evenings because of its low caffeine content. The BIO Kukicha tea stems are cultivated on nutrient-rich volcanic soil in southern Japan in the Kagoshima Prefecture. The fresh spring water in the high-altitude tea gardens and the careful cultivation produce the slightly aromatic Kukicha taste with unique umami. The light green stems result in a light, soft and aromatic infusion.

Product Description:

Zeekei Teas

Brand: ZEEKEI TEAS
Product Name: Genmaicha Premium Bio Green Tea & Roasted Rice

The tea leaves for Genmaicha are grown on nutrient-rich volcanic soil in southern Japan in the Kagoshima Prefecture. The fresh spring water in the high-altitude tea gardens and the gentle roasting process of the organic rice bring the typically nutty Genmaicha taste. The dark green tea leaf and the deep roasted rice make an orange cup with a scent of roasted grain.

Zeekei Teas

Brand: ZEEKEI TEAS
Product Name: Cold Brew - Tencha Leaf & Matcha, Premium Bio Green Tea

A unique combination of Tencha (the special tea leaf for processing Matcha) and Matcha for making cold infused tea (Mizudashi). To prepare a cold brew, you need 1l of cold water and 10g of Cold Brew Tencha-Matcha, which is left in a bottle or jug in a refrigerator for about 8 hours. This aromatic, invigorating and extravagant "iced tea" with its sweetish and at the same time bitter note unfolds its umami almost overnight.

Product Description:

Product: Organic Tencha Premium Green Tea Leaves & Organic Matcha Powder
Quality: Premium Quality - for Daily Use
Directions: 8 hours with 5°C in the fridge
Sensors: Yellow-greenish cup with a sweet and bitter note
